INTRODUCTION

Visi-Reg Benefits & Features:

Easy to Setup and Use

System ready to use in a few minutes. Your receptionist or security guard will be able learn to use it in no time.

Elegant and Customizable Interface

Elegantly designed visitor check in software can be customized to your corporate identify.

Supports Visitor Pre-Registration

Pre-register your visitors for faster check in on the day of your event.

Supports Visitor Self-Registration

User friendly Visi-Reg software allows your visitor to perform self-registration easily.

Prints Professional Visitor Pass

Bundle with professionally designed visitor pass templates.

Flexible

One or more visitor check in station can be deployed. Visi-Reg software can be remotely configurable.

Time Saving

Visitor only needs to register their information once. Faster visitor check in/out. Instantly checks or print who's in/out during emergency. Reports can be automatically generated

Secure

Visitor database can be housed centrally in a separate computer from the visitor sign in computers.

Visi-Reg tasks

Visi-Reg lets your visitors perform the following tasks:

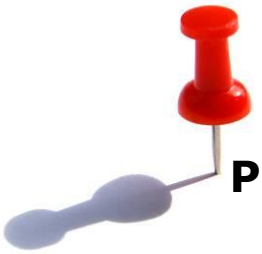

Visitor self-registration
Visitor check in
Visitor check out
Visitor pass printing

Your receptionist or security personnel in charge can perform these addition tasks:

Visitor tracking
Print visitors list during an emergency

Visi-Reg administrator can perform:

Configure the software
House-keeping of your visitors data
Track visitor check in and check out status
Print visitor status statistic
Print host statistic

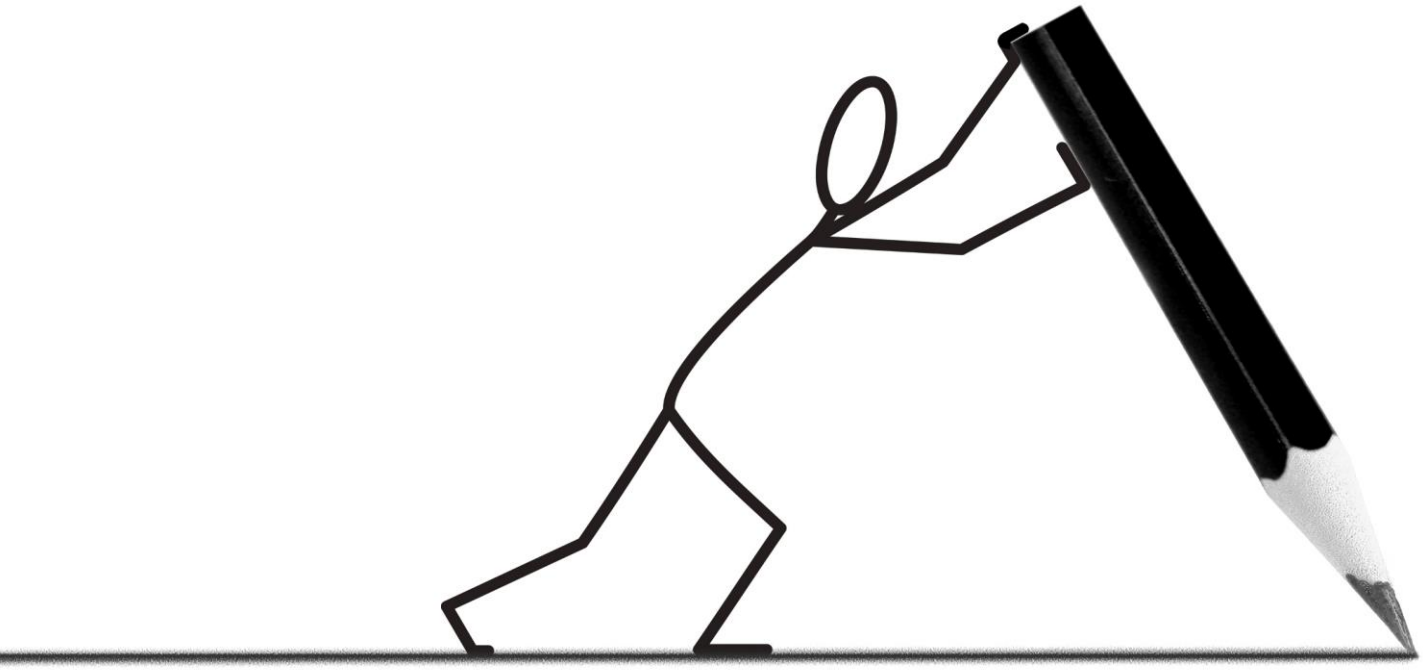

PREREQUISITES

Hardware prerequisites:

PC internet ready
2 Gb RAM

device for data backup (ext. HD, stick...)
bar code scanner (option)

Software prerequests:

OS: Win Xp/2000/2003/7
MS SQL Express 2005/2008/2012
VPN SW for remote installation / support/ upgrade

1. VISI-REG APPLICATION

1.1 User Interface

• At the starting screen in the upper left corner you can choose a language. Default language set is English. .

• There are two options: Scan BARCODE or choose IN/OUT (login / logout)

• To manage application you can **use touch screen or mouse buttons.**

1.2 Check IN

• If you want to **check in**, select **'Check In' button** on the screen.

• Next picture is showing the 'Check In' screen:

• **Mandatory fields are**: Company Name, Visitor and Host Name. They are marked with message 'Mandatory Field'. **Mandatory Field must contain data.**

• To enter data in the field, use the keypad **on the bottom of the screen** (keyboard contains only uppercase letters) or you can open a list by selecting a button  , which opens a list that was previously defined.

• You can **enter phone contact, tax code and purpose of visit**, but they are **not mandatory**. Purpose of the visit is selected from the drop down menu  .

• If you want to leave the 'check in' screen, select the button **'Quit'**:

• After all required fields are filled with data , button **'Confirm'** will appear on the screen:

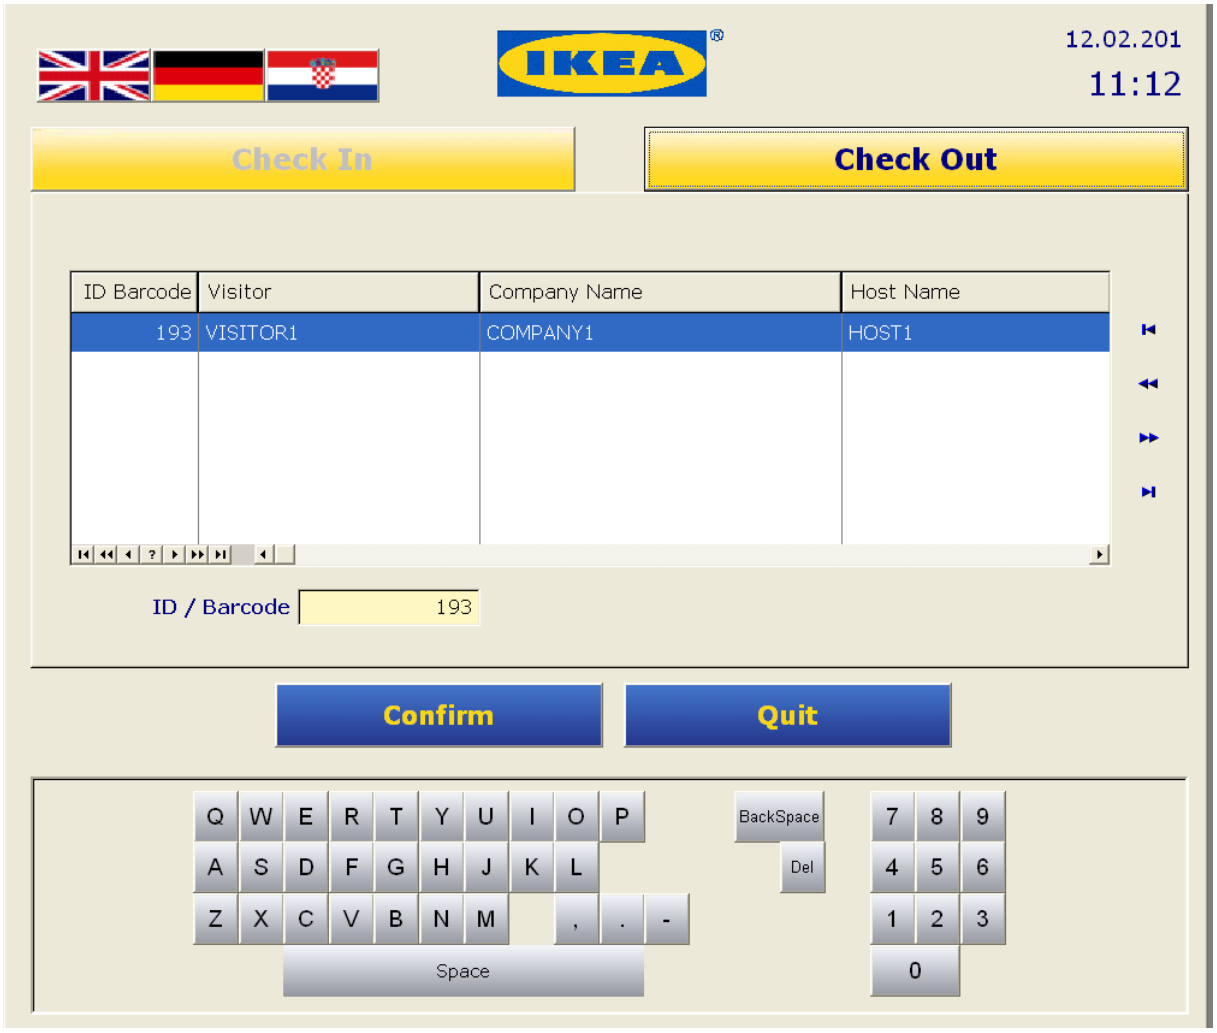

• Press the button **'Confirm'** to verify all entered data . The user will be transferred to the main screen. At the bottom of the screen you will see a message:

'Thank You, You have successfully Checked In'

1.3 Check Out

• In the **Check out screen** you can see a list of 'checked in' users. The picture below shows us the 'check out' screen with users who has been previously Checked in.

• **If you want to 'Check out'**, it is necessary **to highlight the visitor in the list** and choose button 'Confirm' :

• Or, if you would like to cancel the 'Check out', you need to choose button 'Quit': 

.

• After selecting button **'Confirm'**, user will be transferred back to the main screen. At the bottom of the screen new message will appear:

'Thank You, You have successfully Checked Out'

• If you want to open **'check in'** while you are in the 'check out' screen, it is not necessary to go to the main screen. You can **transfer from 'check in' to 'check out'** by pressing a button 'check out', and also opposite, if you want to transfer from **'check out'** to 'check in' press the button 'check in'.

1.4 Reports, Stickers, Exit kiosk mode

• At the main screen you can see a symbol picture of IKEA.

• By pressing **on that picture**, a new window opens, where you can see report , stickers and exit kiosk mode.

• In the image below you can see the image view of that window:

• If you want to perform any action it is necessary to enter the password. How to change a password will be shown later in the manual.

• After you type the password, you can choose one of the options:

Reports

Stickers

Exit kiosk mode

Go to shutdown

• After choosing one of the options you need to press **'Confirm'**.

1.4.1 Reports

• If you select 'reports' and you type the correct password, window will appear:

Date of entry from : Selecting date for which report will be shown.

Host Name : Enter the Host name or choose host from the list. To open the list press  .

Company Name: Enter the Company name or select Company name from the list. 

Full Name: Enter the full name of visitor or select from the list. 

Report Types

• you can choose different types of reports:

Pre-Registration – Users who are registered within the selected date.

Who's In – Visitors who are currently checked in.

By Date, By Host, by Visitor - Opens the report sorted on the basis of the selected options.

1.4.2 Stickers

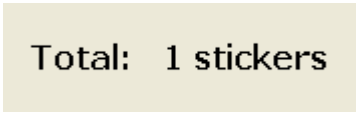

• The same way you choose reports, you choose stickers. If you choose stickers, new window appears.

• Example window is shown below:

• If we want to add sticker for the user from the list, you need to click or touch the name on the screen twice. When you **mark** the user they get sign  in ID Barcode.

• Those users who are **not marked** have the sign  . When you choose a user with check mark, a total number of sticker will increase by one:

• If you want to mark **all visitors** from the list, select button ' Select All' and if you want to unselect all visitors from the list select button ' Unselect All'.

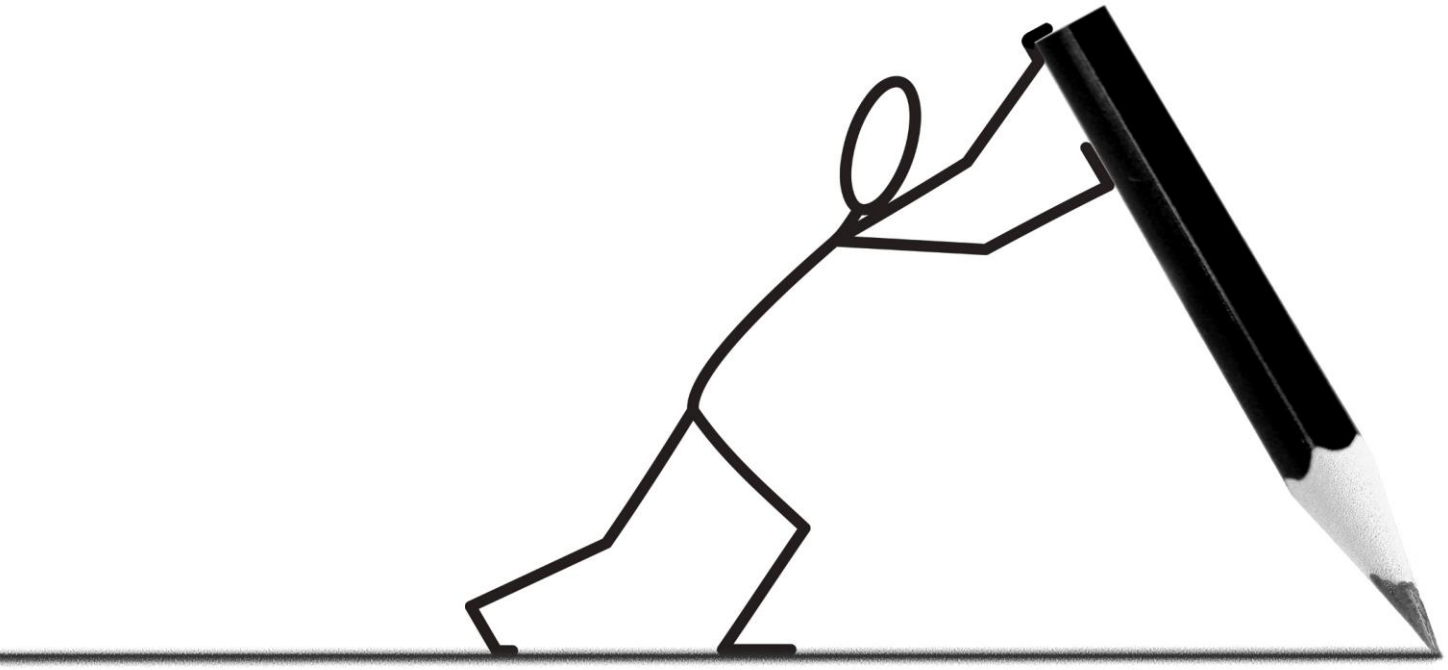

• To confirm selected visitors press 'Confirm':

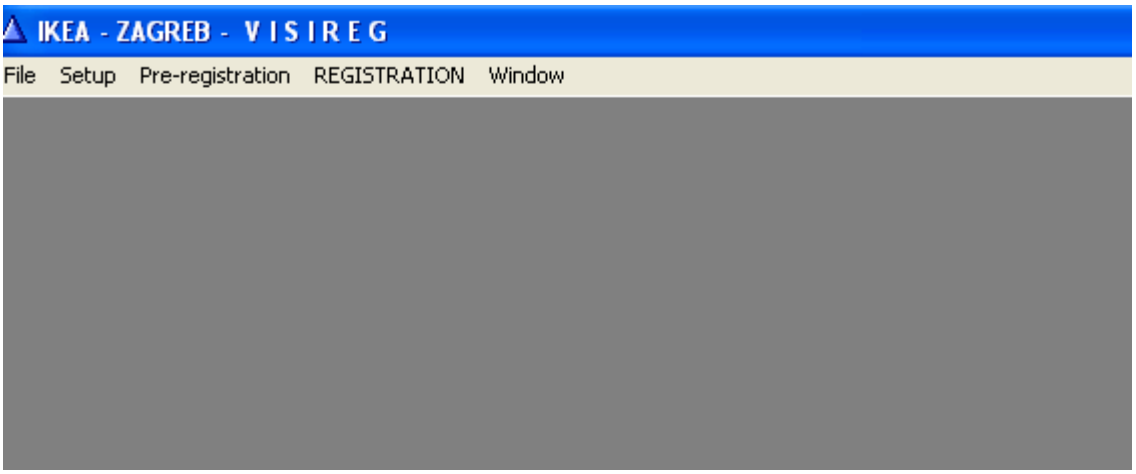

1.4.3 Exit kiosk mode

• In the same row when you can select Stickers and Reports, you can also select 'Exit kiosk mode' .When you type correct password and you select 'Exit kiosk mode', press Confirm to **leave the application**.

2. VISI-REG SETTINGS

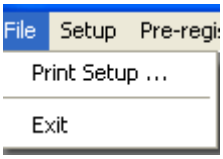

• The main screen consists of the menu bar that contains File, Setup, Pre-registration, Registration and Window.

2.1 File

• In the File menu you can choose Print setup and Exit:

Print setup - For printer settings.

Exit - Leaving the application.

2.2 Setup

• In the setup menu you can manage with:

Host.

Company, Visitors.

Purpose of Visit.

IKEA / Location, Languages, Kiosk.

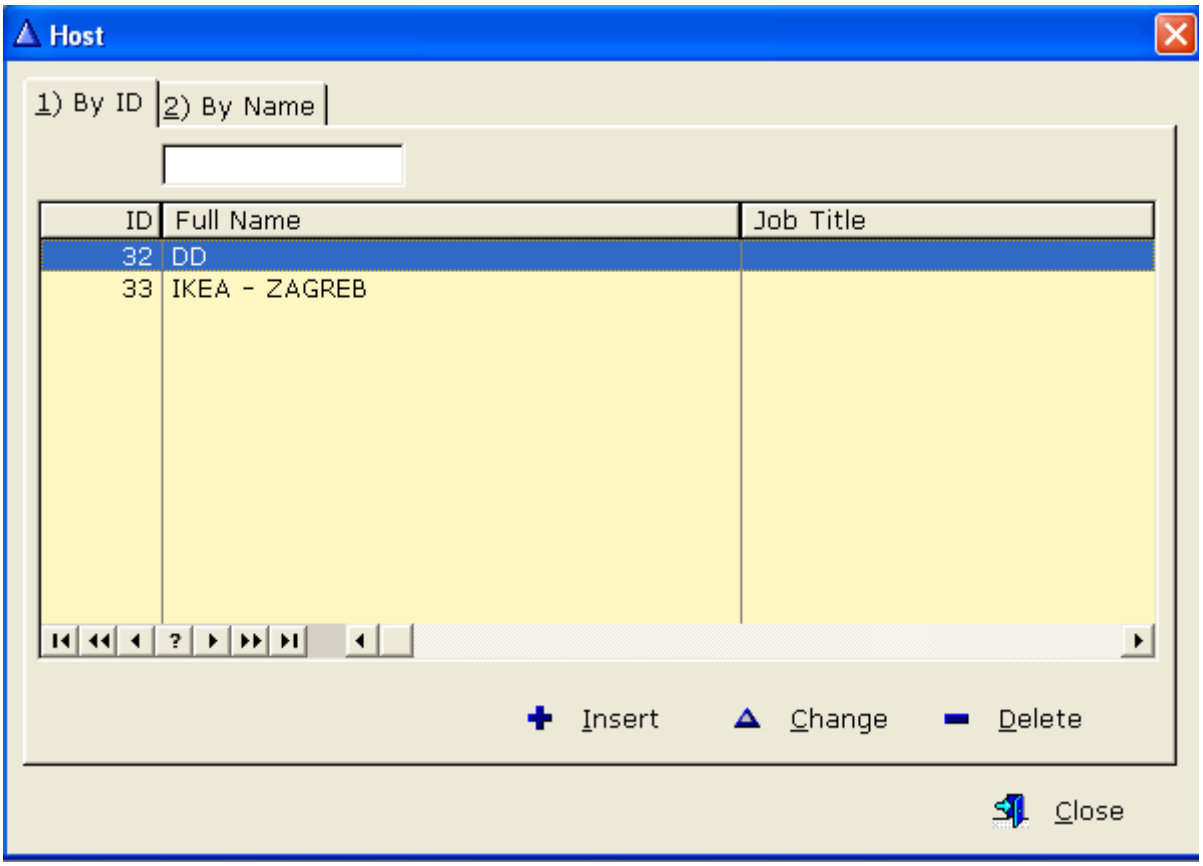

Users.

2.2.1 Host

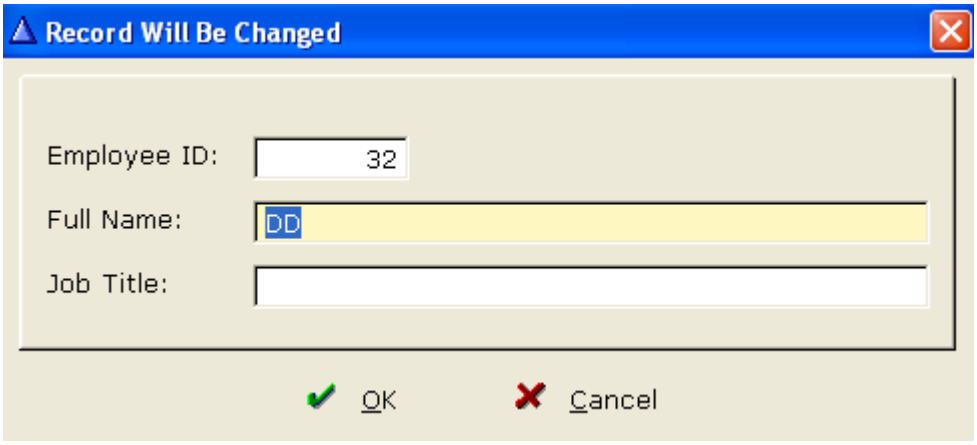

• When you select **'host'**, new window opens:

• Data in columns shows **host ID, full name and Job Title**.

• Data in the columns can be edited. To do that ,press the 'Change'  button or use keyboard shortcut 'Alt c '.

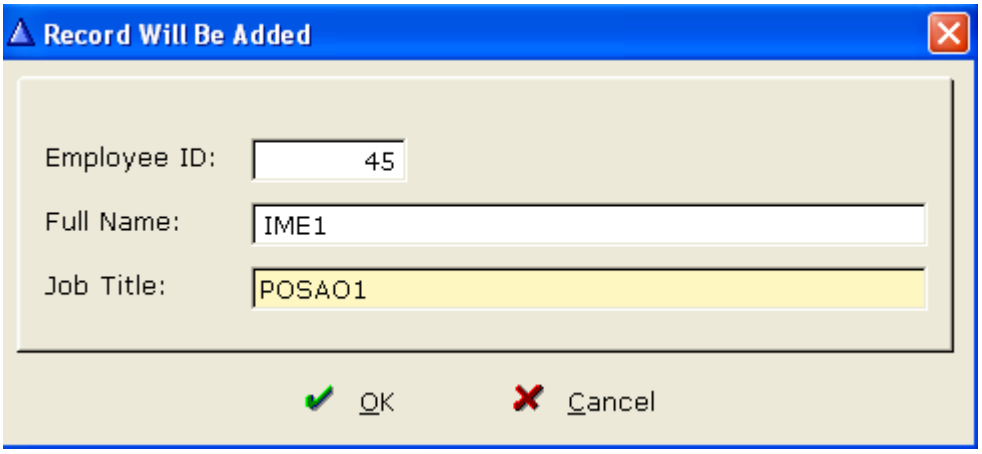

• New window opens:

• You can change **Employee ID, Full Name and Job Title**. Confirmation of the changes is done by clicking on the **'OK'** button or by using shortcut 'Alt o'. To cancel changes click the **'Cancel'** button or use shortcut 'Alt c'.

• It is also possible to add a new host by clicking the **'Insert'** button or by using shortcut 'Alt i'.

• A new window opens:

• After **entering the ID, host name and job title**, Click **'OK'** button to confirm new entry.

• New host has been added to the list:

ID	Full Name	Job Title
32	DD	
33	IKEA - ZAGREB	
45	IME1	POSAO1

• The list can be sorted by ID or by name. 

• Host can be deleted. **To delete host** you need to highlight it and press delete button 

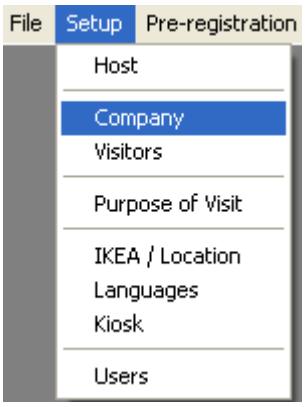

.

• When you click on **'Delete'** , a new window will open with question to confirm deleting. To confirm press 'OK'. To Cancel press ' Cancel'.

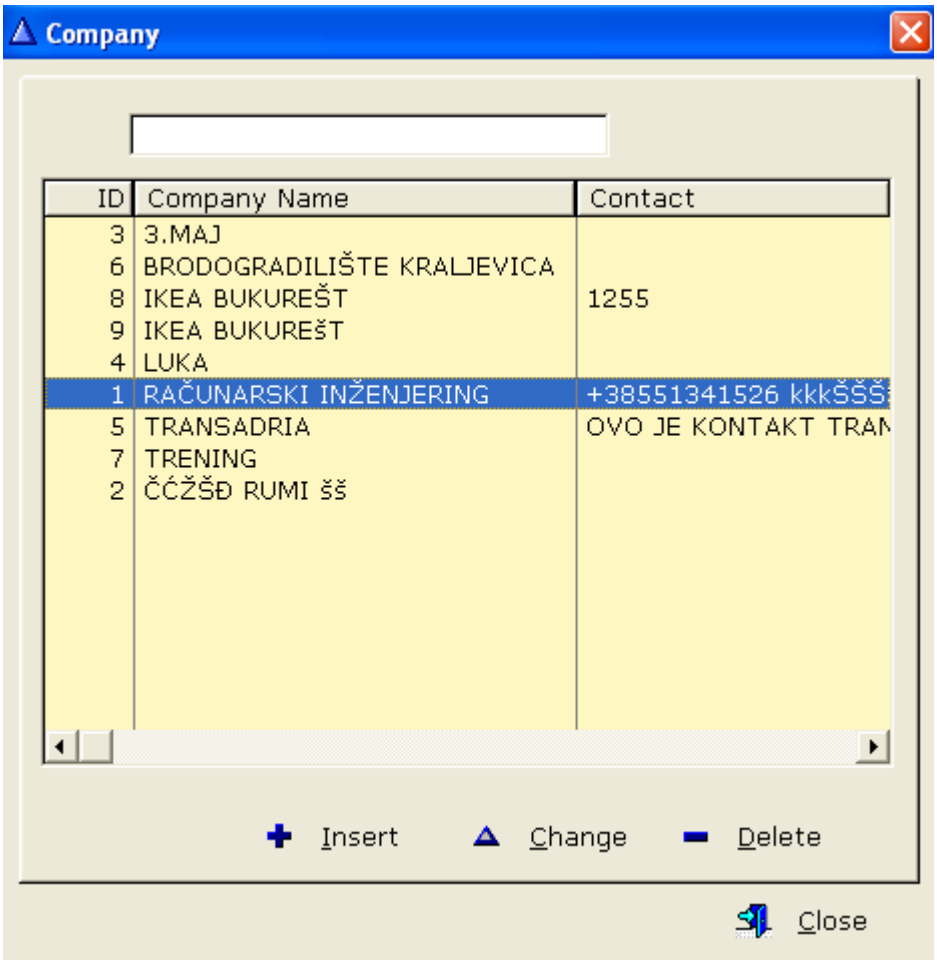

2.2.2 Company

• In setup menu you can select Company where you can see a Company list, and manage that list:

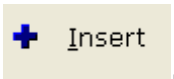

• New window opens:

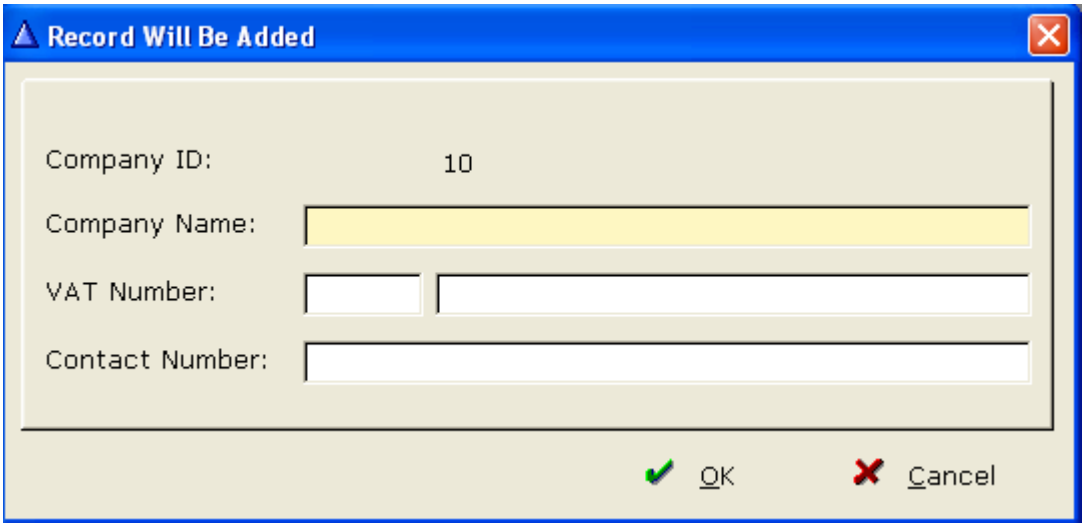

• The columns shows data for: **Company ID, Company name and Company contact**.

• In the empty field  it is possible to enter the name of the company to find it.

• Company Data can be **edited** by clicking on 'Change'  (Alt c), or **deleted** by clicking 'delete'  (Alt d).

• **New company can be added** by clicking on ' Insert' (Alt i)  .

• If you press 'Insert', new window will open:

Company ID - Company ID is assigned automatically and it can not be changed.

Company Name - Enter the Company Name you want to create.

VAT Number - Enter the VAT number. **A value added tax identification number** or VAT identification number (VATIN) is an identifier used in many countries, including the countries of the European Union, for value added tax purposes.

Contact Number - Enter the Contact Number of company you are creating.

• After you entered data, click **'OK' button (Alt o)** to confirm. To Cancel click **'Cancel' (Alt c)** button.

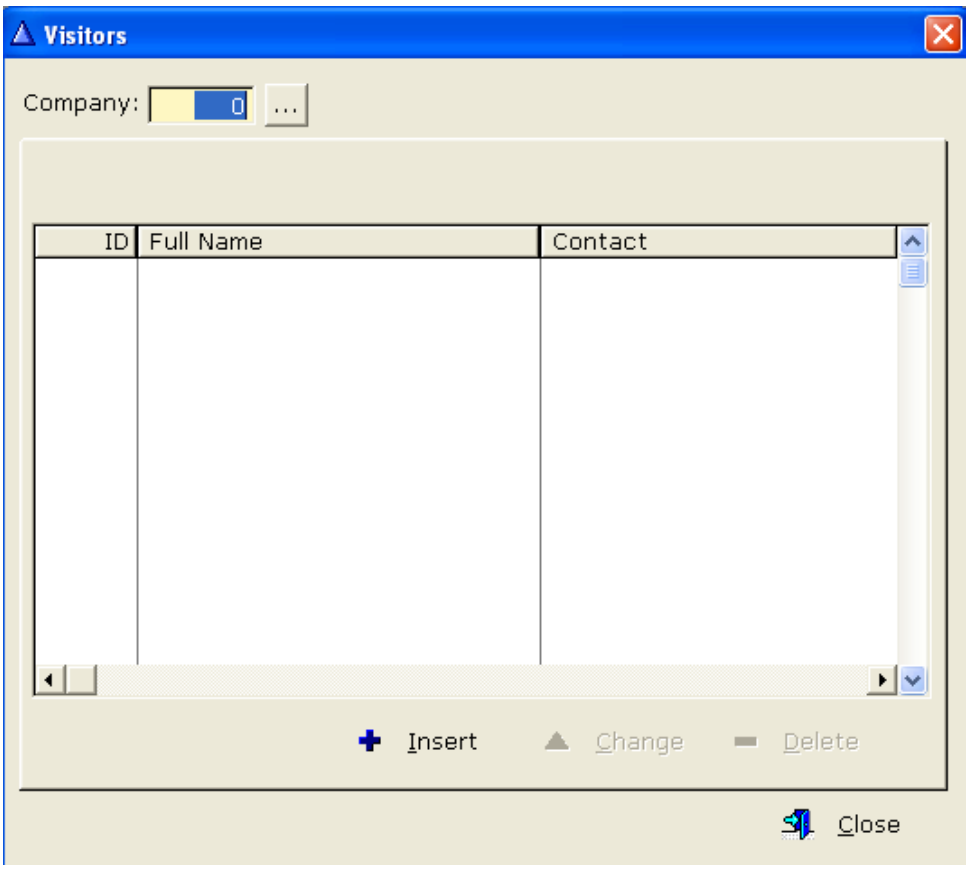

• If you press 'OK' the data will be confirmed and added to the list.

2.2.3 Visitors

• If you want to add the list of visitors in Company press on the 'Visitors' in setup menu.

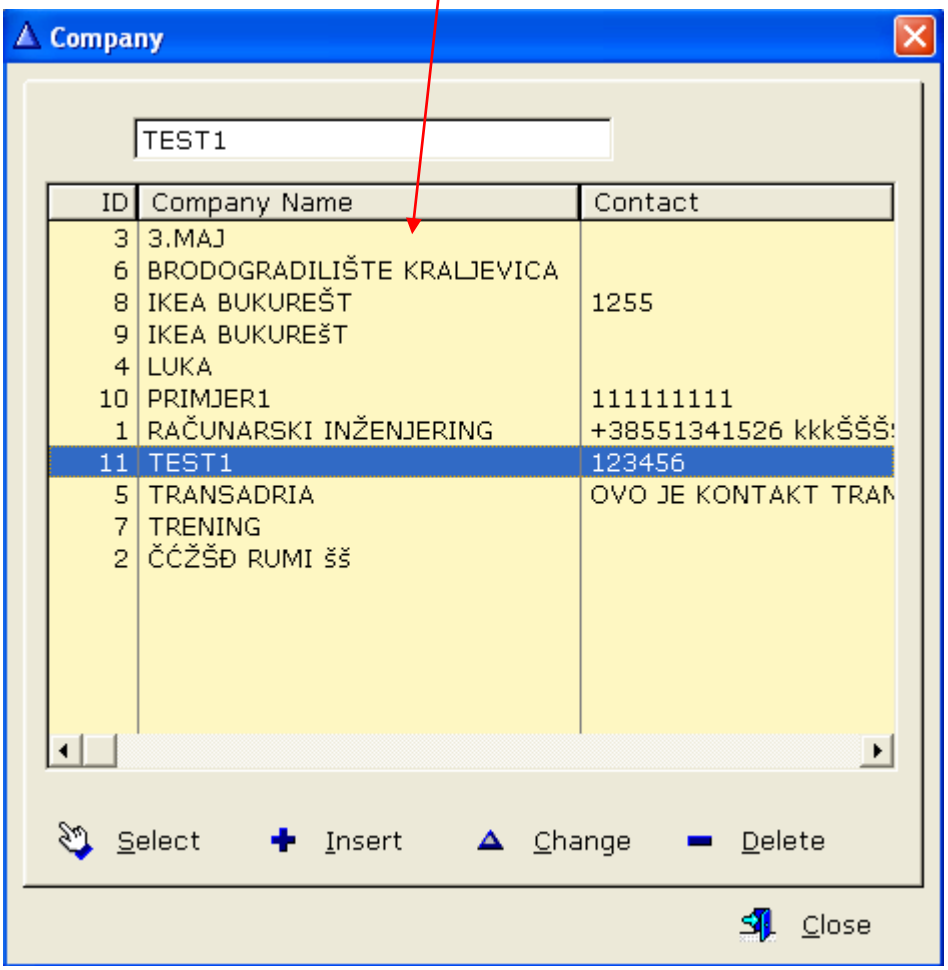

• After selecting ' Visitors' a new window opens:

• In the upper part of the window 

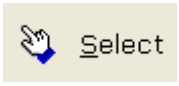

click on button ... **to open a list of companies that have been previously created**. It is also possible to choose a company by entering the ID number.

• When you click on button ... new window opens:

• In the upper picture you can se 'Company' window with the list of Companies. Each Company contains its unique ID.

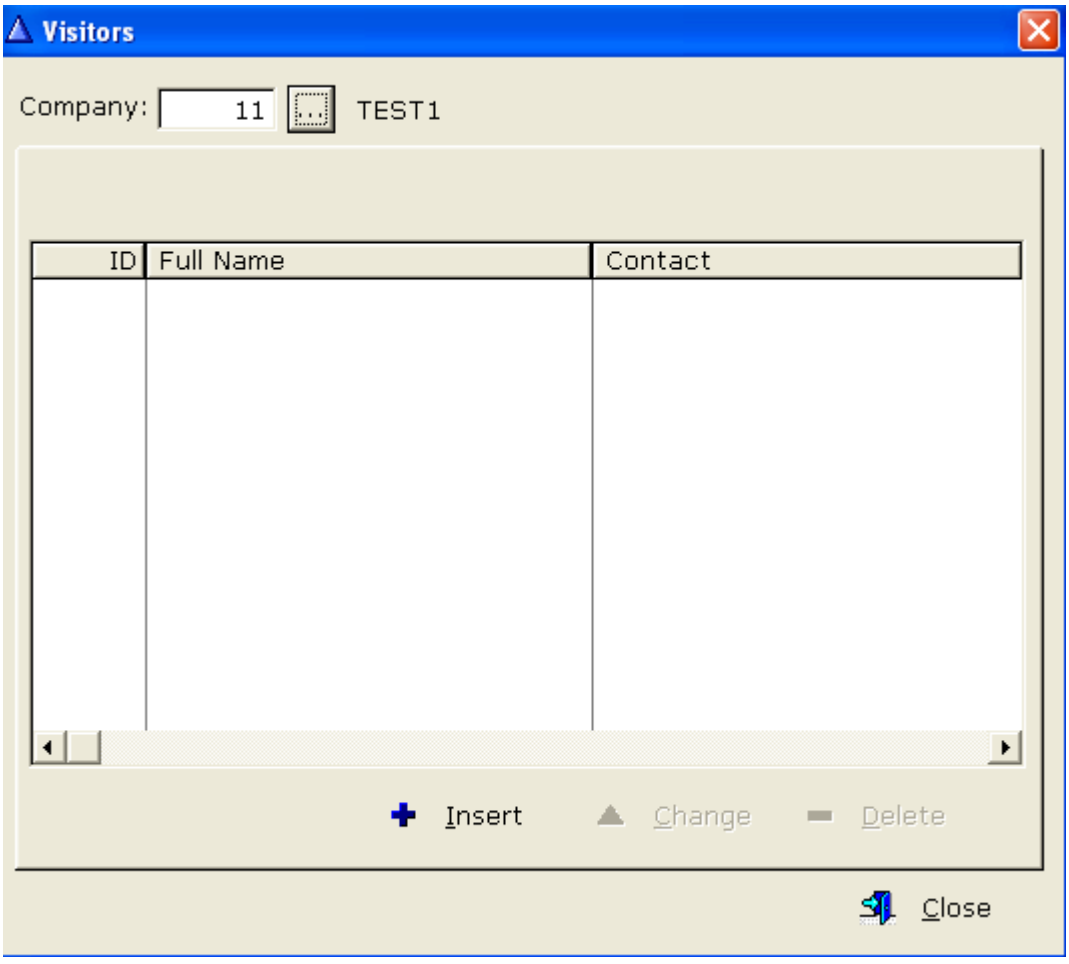

• Company can be also find by **entering its name in the field** in the upper part of the window.  .

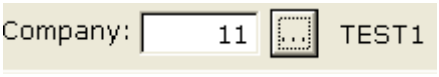

• To choose company you can highlight it and then press the 'Select' button 

. Another way is to select company by double mouse click.

• In the shown window it is also possible to **create new company** (Insert), **Change data** (Change) or **Delete data** (Delete).

• **In the example at the image above**, company TEST1 with ID 11 is highlighted. If you check it, a new window will appear:

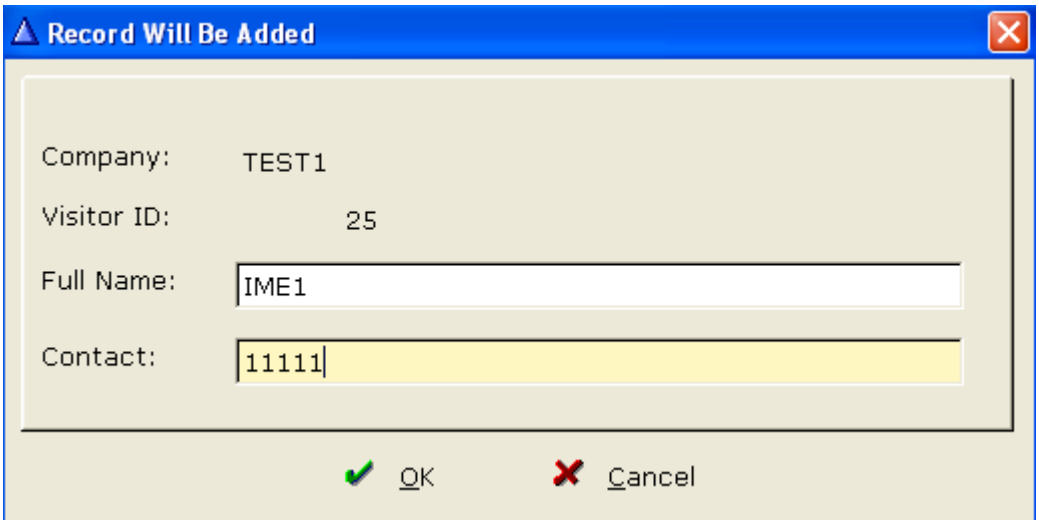

• As you can see, selected company is TEST1 with ID11: 

.

• You can also see that the company list is empty.

• To **add new visitor** to the company 'TEST1', press 'Insert' or type 'Alt i'.

• New window will open:

Company – You can see company name for which you are adding a visitor.

Visitor ID – ID is assigned automatically.

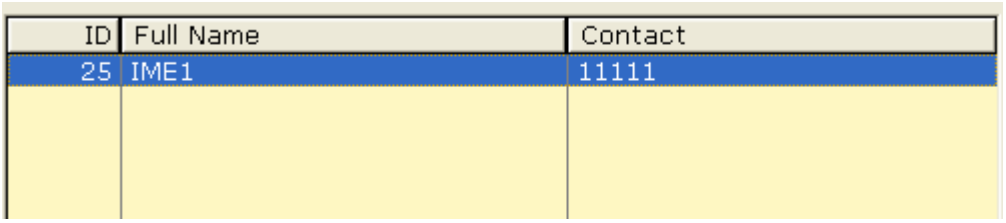

Full Name – Enter the full name of the visitor.

Contact – Enter the phone number of the visitor.

• If you want to **confirm entered data** press 'OK' or type 'Alt o'.

• If you want to **cancel entered data** press 'Cancel' or type 'Alt c'.

• If you choose to confirm data, Name and Contact **will be added in the list of visitors**:

ID	Full Name	Contact
25	IME1	11111

• For adding the new visitor to the list repeat the process. (Insert).

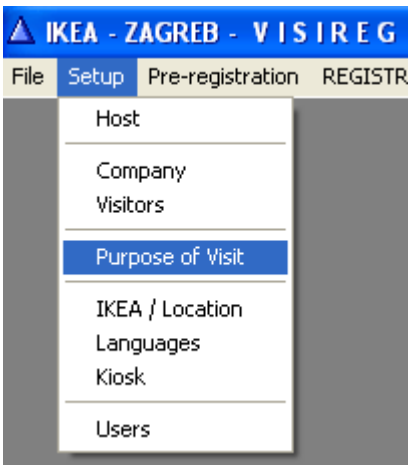

• For **every visitor it is possible to change data**. To do that you have to highlight the visitor from the list and press **'Change'** or type 'Alt c' on the keyboard. You can change name and contact while the ID is unique and it can not be changed.

• Each visitor can be **deleted** from the list of visitors. To do that you need to highlight the visitor and press **'Delete'** or type 'Alt d'.

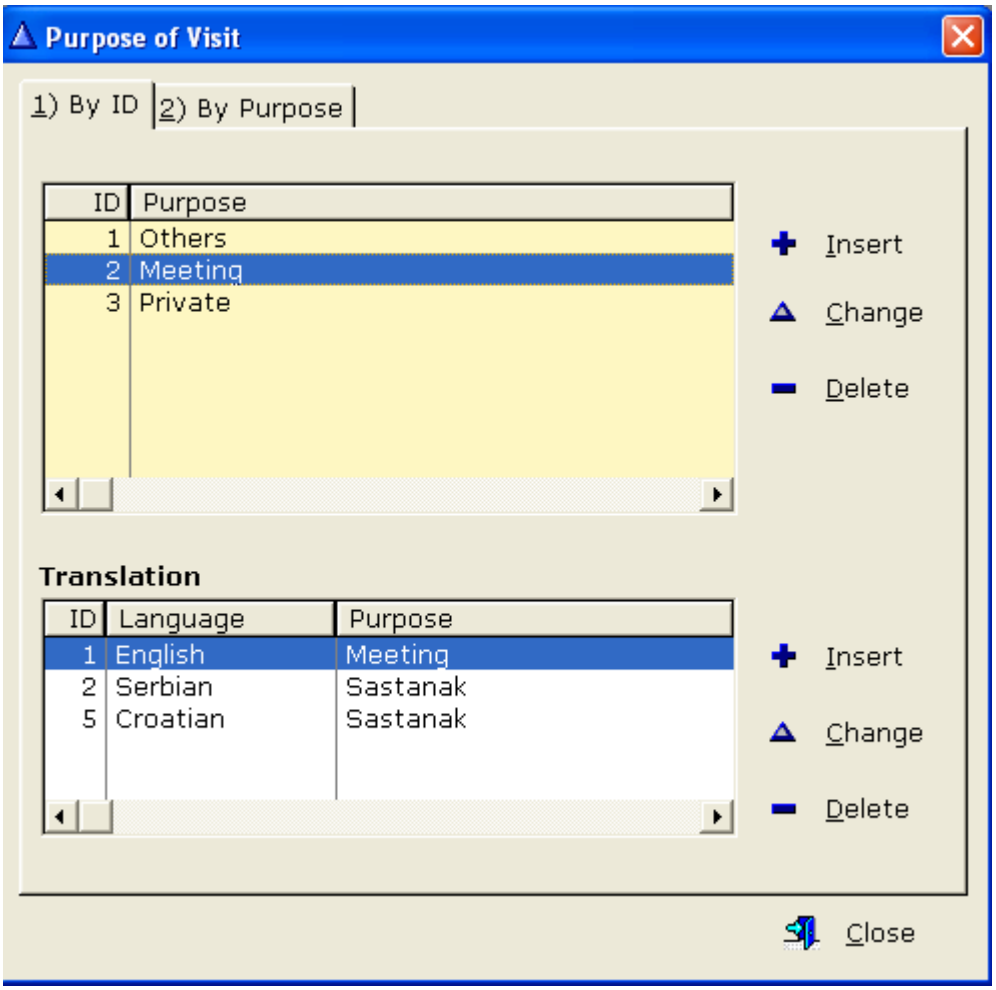

• If you want to leave the window press the Close button Close. Or press , or press 'Esc' button on the keyboard.

2.2.4 Purpose of Visit

• To add purpose of visit you need to select 'Purpose of visit' in the setup menu.

• When you click 'Purpose of Visit', new window opens:

• In the Window shown above you can see **two lists**:

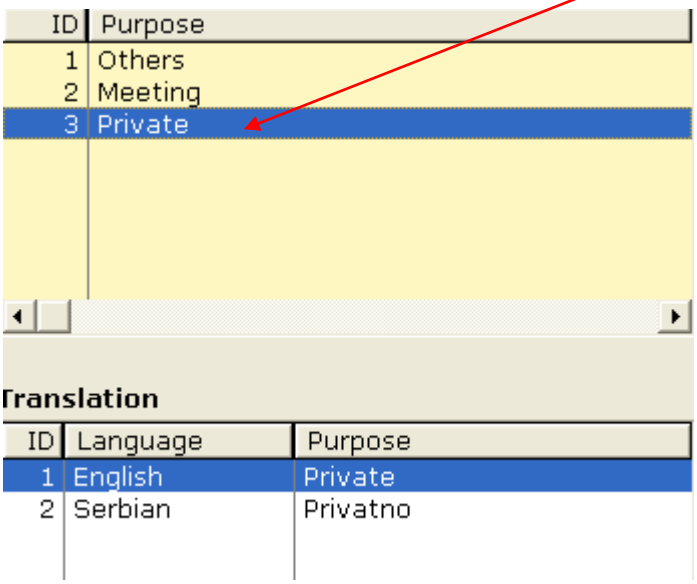

• **First list** contains a data for created **purpose**. Data can be sorted by Purpose 2) By Purpose or by ID 1) By ID. Each purpose contains a unique ID.

• **The second list** 'Translation', contains created Language (Translation) for highlighted purpose.

• The figure in example shows that the 'Meeting' is highlighted.

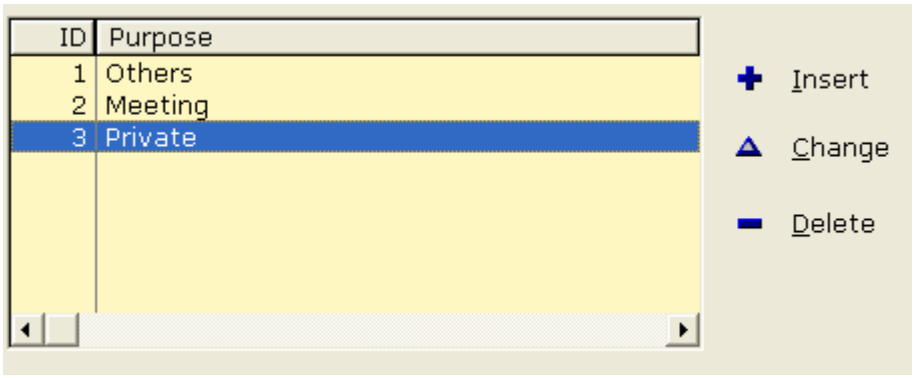

• There are 3 translations created for 'Meeting'. English (Translation-Meeting), Serbian(Translation-Sastanak) and Croatian (Translation-Sastanak).

• If you Highlight some other purpose, for example ' Private', you will see translations for 'Private' as it show on the next figure:

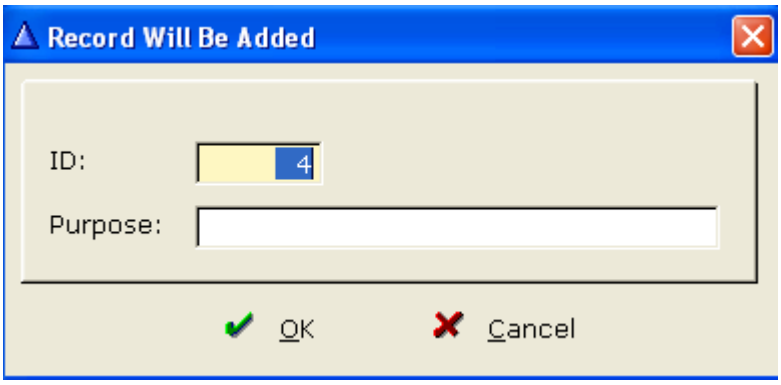

• Purpose 'Private' has two translations: English (Translation-Private), Serbian (Translation – Privatno).

• **New purpose can be added** by clicking on 'Insert' button which is located next to the purpose list:

• When you press insert, a new window appears:

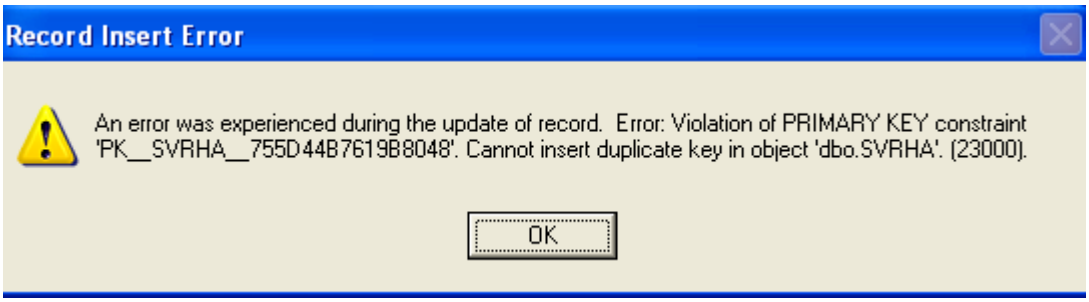

ID - each purpose has its own unique ID. ID is assigned automatically, but you can change it. ID must be unique.

Purpose - Enter the name of the purpose in the field.

• After entering data, if you want to confirm data press **'OK'** button or type 'Alt o'

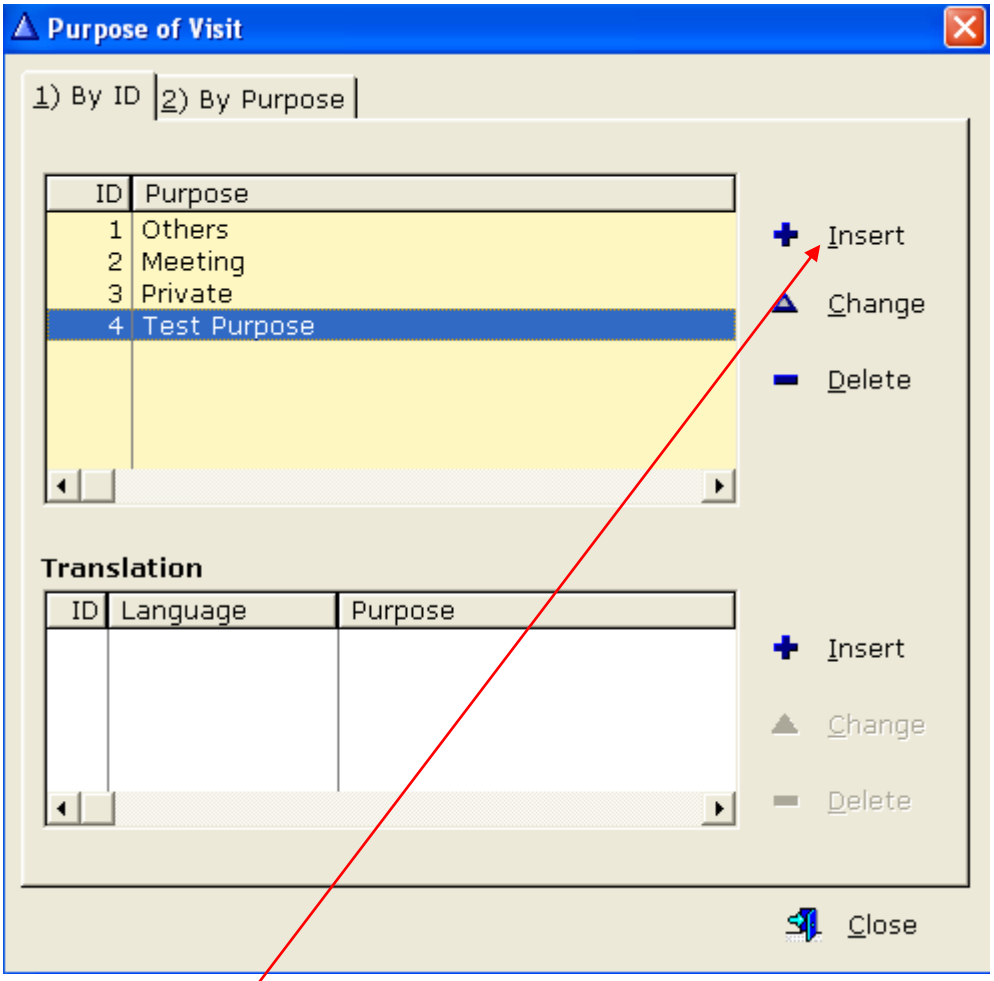

• If you want to Cancel, press **'Cancel'** button.

• If you enter ID that already exists and press OK, an error message will appear:

• If that happens, press OK, and then enter the correct ID that is unique.

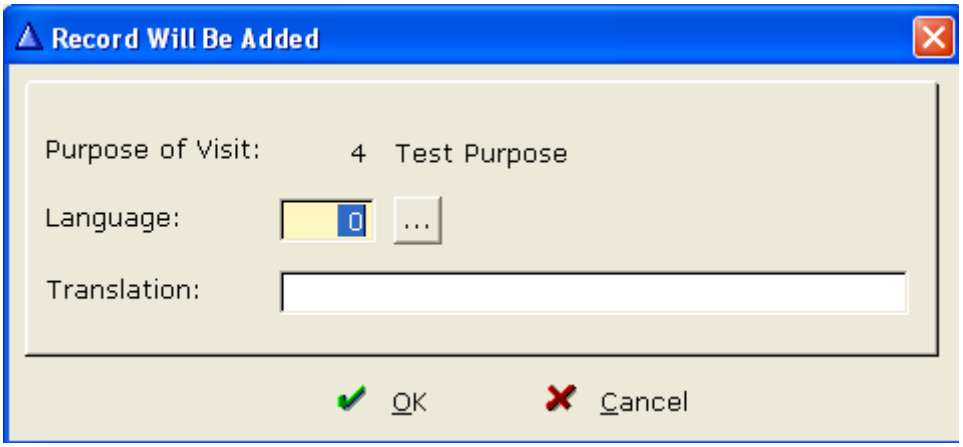

• If you successfully entered data, new purpose will appear in the list:

• Image above shows the new list. Purpose 'Test Purpose' has been added on the list. As you can see, translation for 'Test Purpose' does **not exist.**

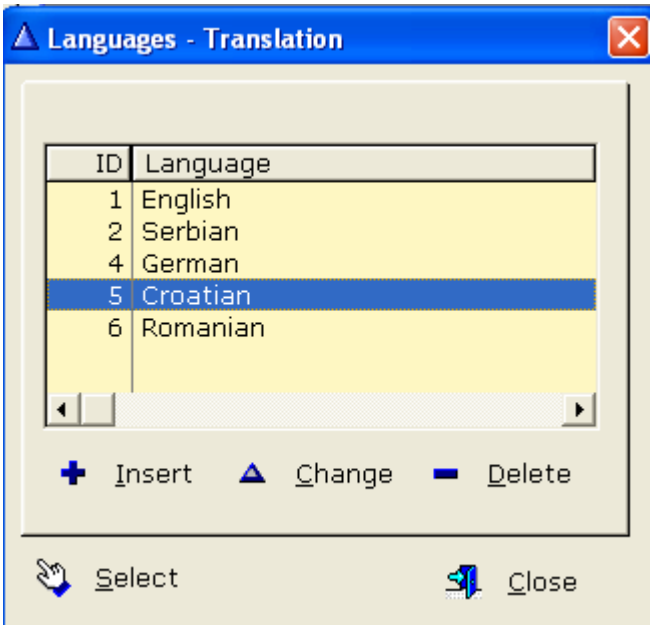

• If you want to **add language for highlighted purpose** press the 'Insert' button.

• After you press 'Insert', new window opens:

Purpose of Visit : Purpose of visit shows ID (4) and name (Test Purpose) that was selected, purpose for which we are adding translation

Language : To add language from the list press ... button. New window appears:

• In the image above, you can see the **list of created languages**. It is possible **to add new language to the list**. To do that press **'Insert'** button or type 'Alt i'.

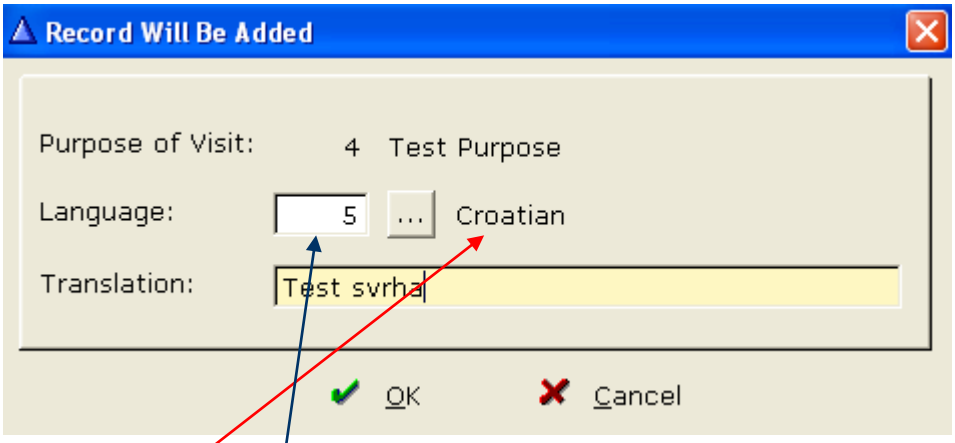

• Language **can be changed**. To change language you need to highlight language you want to change and press the **'Change'** button or type 'Alt c'.

• You can also delete language by pressing the **'Delete'** button, and confirming the deleting with 'OK'.

• To assign the language to a purpose, you need to **double-click on the language** you want to assign, or you can highlight a language and press **'Select'** button 

.

• In the example image, selected language is English.

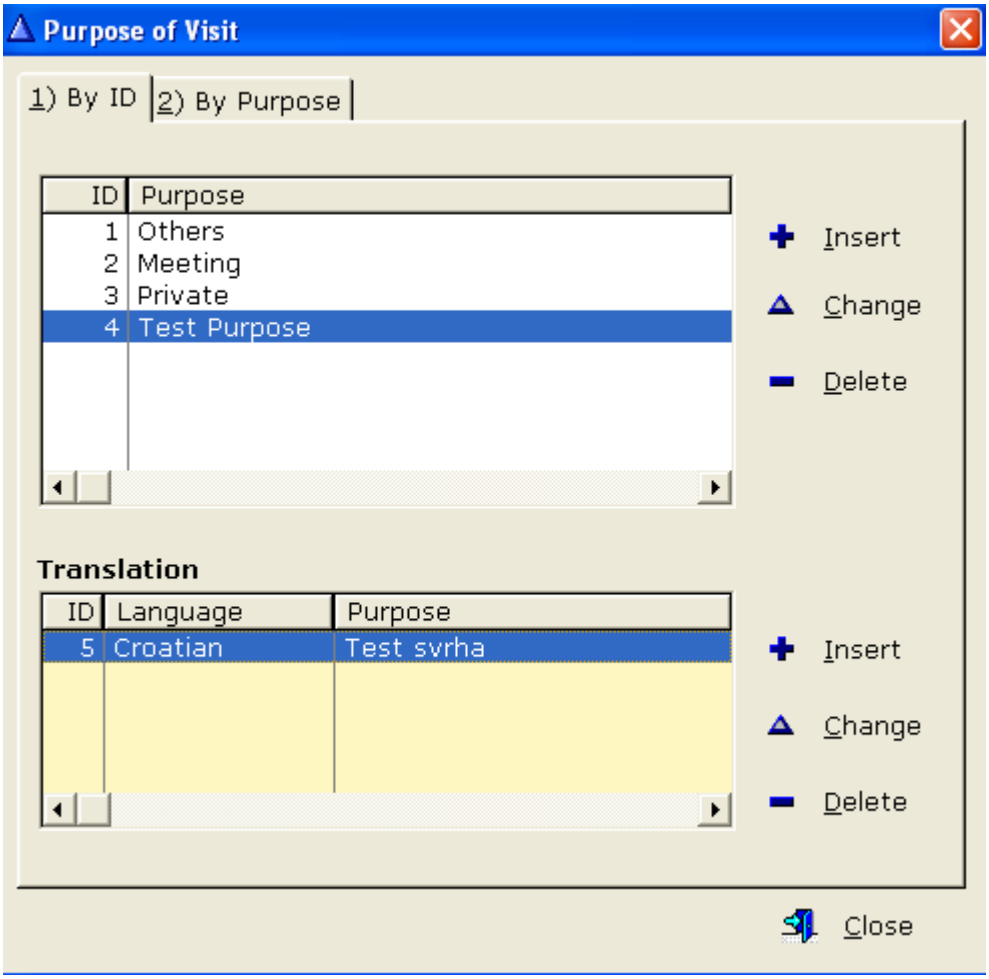

• At the image above, you can se that the assigned language is Croatian. His ID is 5.

• To assign language, it is not necessary to press the 

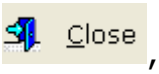

button.
In the field next to that button you can enter ID number and the language with that ID number will be assigned.

• To confirm press 'OK' or type 'Alt o'.
• To Cancel press 'Cancel' or type 'Alt c'.

• If you choose **to confirm the entry**, translation for the 'Test Purpose' **will be added to the list** as you can see in the image below:

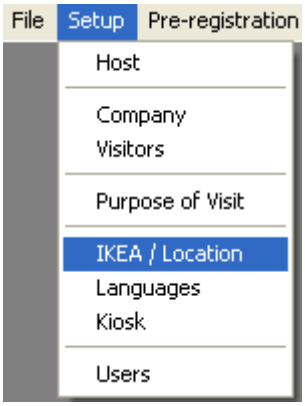

• For a highlighted purpose (Test purpose), you can see that the assigned translation is Croatian, and that the translation for 'Test Purpose' on croatian is 'Test svrha'.

• After created translations, if you want to leave the 'Purpose of Visit' window, press Close 

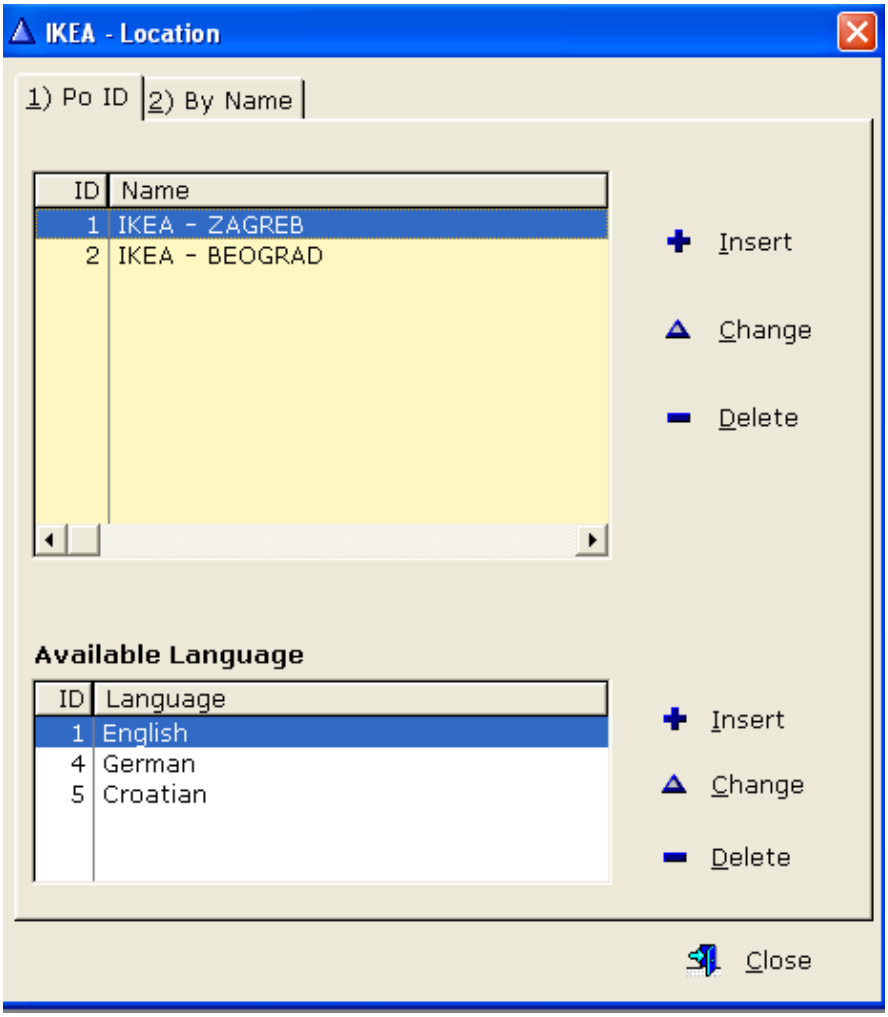

,  , or 'Esc' button on the keyboard.

2.2.5 IKEA / Location

• If you want to add IKEA location and assign languages for every Location, select IKEA/Location in the 'Setup' menu.

• In IKEA / Location window you can add IKEA locations, assign languages and edit assigned locations and languages:

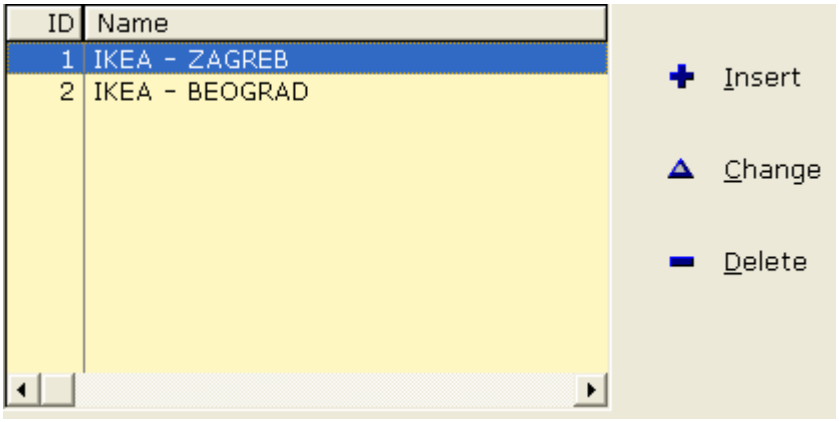

• There are two lists displayed in IKEA / location window.

• **First list** shows IKEA locations, and the **second list** shows available languages for highlighted IKEA location.

• In the shown example you can see that Location Zagreb has three available languages: English, German and Croatian.

• Locations can be sorted by ID number or by Location name: 1) Po ID 2) By Name.

• If you want to add a new location to the list, press the 'Insert' button which is located next to the list of locations:

• After you press on Insert button, a new window appears:

ID: Enter the ID number. ID number identifies location and every location must have unique ID number.

Company Name: There are four fields in the 'Company name'.

- **At first field** enter the name of IKEA (IKEA-CITY1)
- **At the other three fields**, enter other informations. Recommended informations are: **Address, zip code and country**.

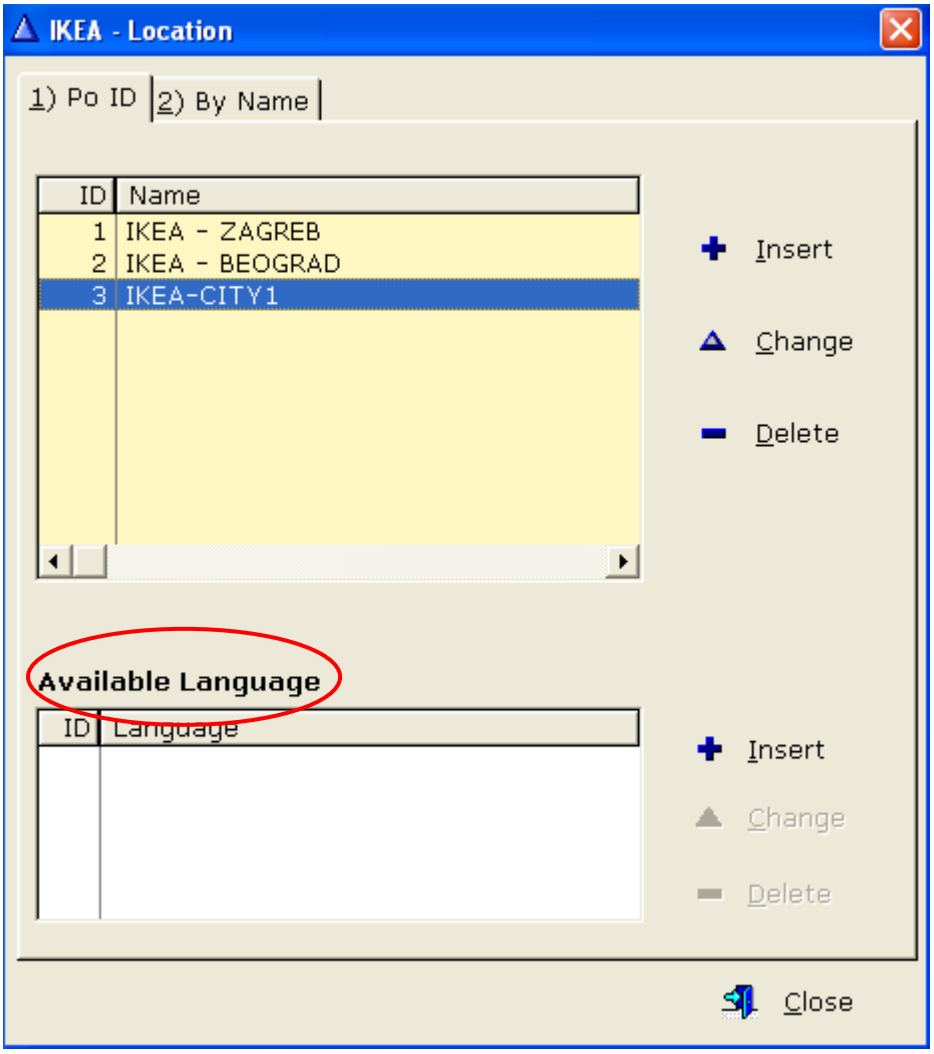

Default Language - Default language is main, initial language that assigned company will use. You can select default language from the list by pressing the  button or you can enter ID number in the field.

• When you are entering data for the new IKEA location you can not assign default language to that location because there is no created default language for that location.

• After entering data, press **'OK'** or type 'Alt o' if you want to confirm.

• If you want to Cancel, press **'Cancel'** button or type 'Alt c' if you want to Cancel.

• After pressing 'OK' button, a new company is added to the list.

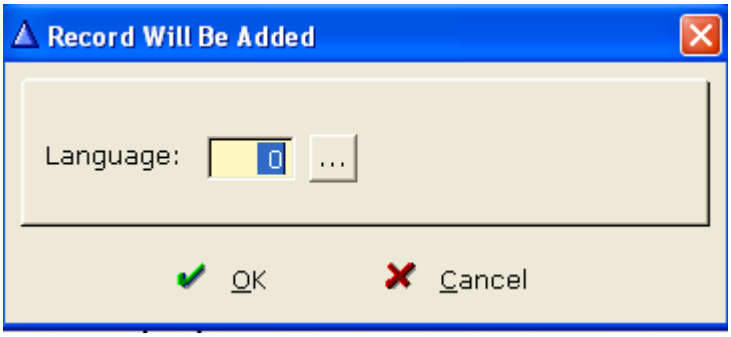

• New IKEA-Location **is added to the list (IKEA-CITY1).**

• In the shown example, new IKEA-location is IKEA-CITY1. As you can see there is **no available languages** for IKEA-CITY1.

• If you want to **add language or languages to a location** you need to highlight location and press 'Insert' 

, next to the 'Available Language' list.

• After pressing 'Insert' , new window opens:

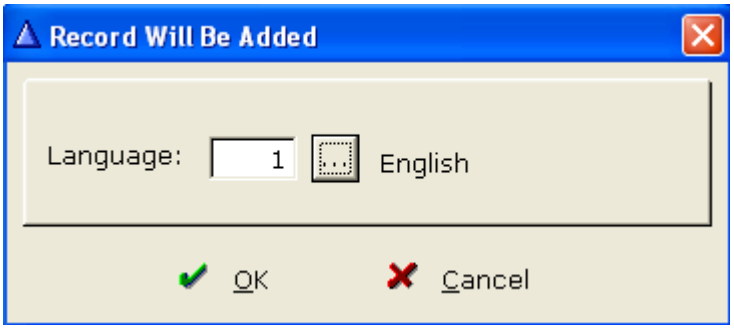

• You can choose a language by entering his ID number or pressing the ... button to open the list of available languages.

• You can select language by double-click on the language you choose, or you can highlight the language and press 'Select' button.

• You can also edit languages by pressing the button 'Change' or typing 'Alt c' . If you want to delete language from the list, press the 'Delete' button or type 'Alt d' on keyboard.

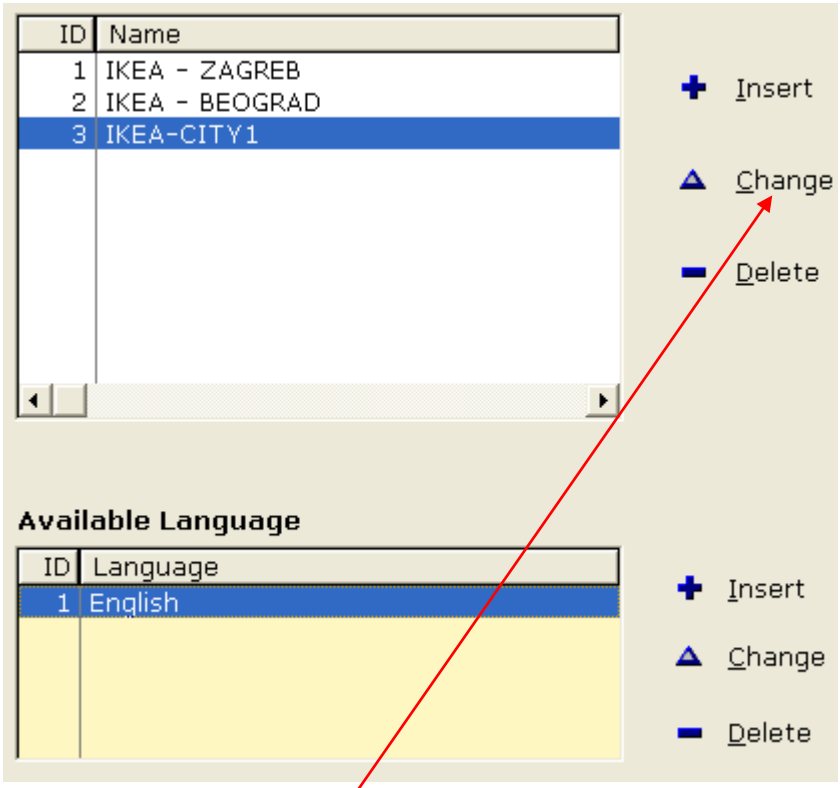

• When you select language you want to assign, the language will be shown:

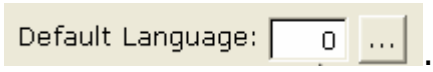

• to confirm a language press 'OK' button or type 'alt o'

• To cancel press 'Cancel' button or type 'alt c'.

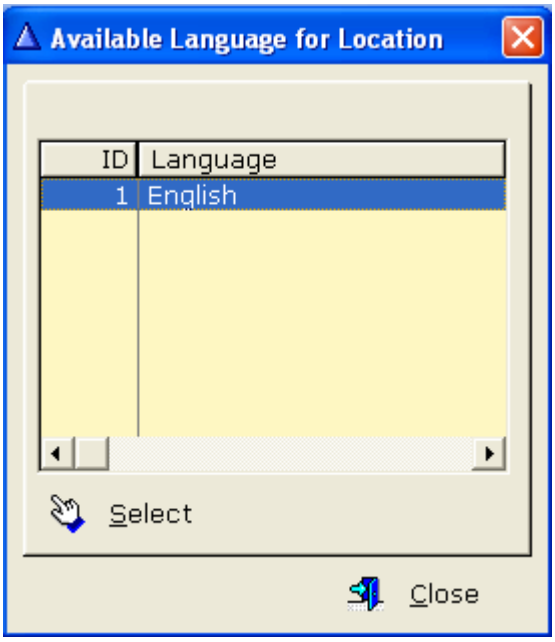

• If you confirm language, that language (English) will be added to the list:

• It is now possible to assign default language. To assign default language press 'Change' and then open a list of default languages or type language ID number 

.

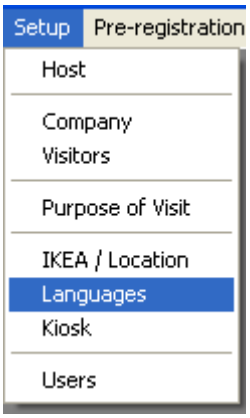

• As you can see, only available language for 'IKEA-CITY1' is English. To assign 'English', double-click on the language name you want to assign or you can highlight language and press ' Select'

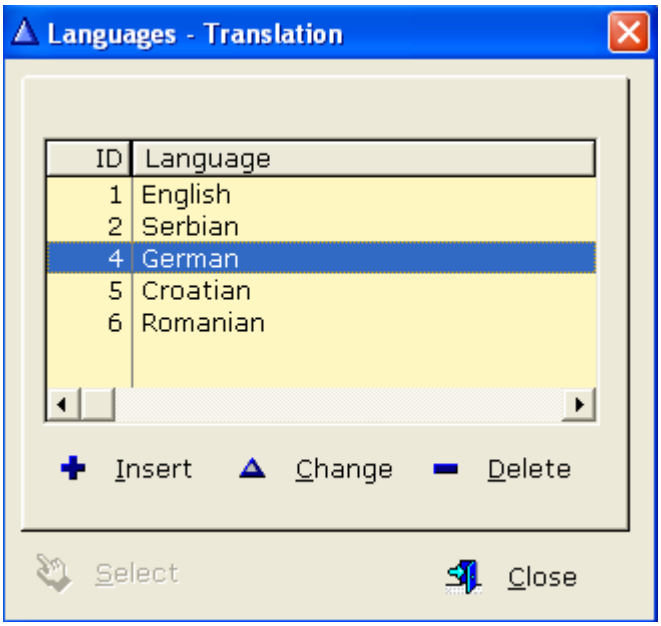

• Each location can have more assigned languages, but only one default language.

2.2.6 Languages

• To manage languages select 'Languages' in 'Setup' menu:

• When you select 'Languages', a new window appears:

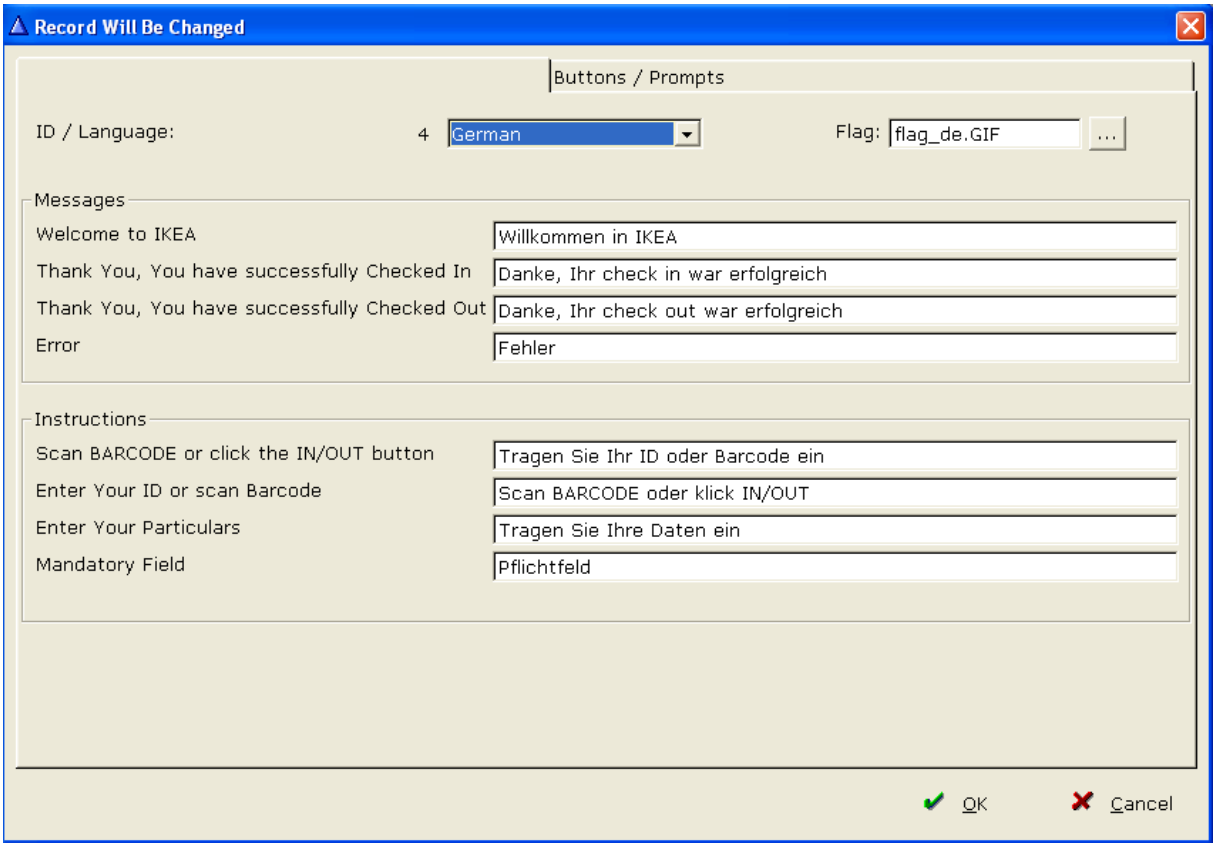

• In the shown example, 5 languages are created.

• To change data for certain language, highlight language and press 'Change' (Alt c) or double-click on language.

• If you want to delete language from the list. Highlight language and press ' Delete' or press 'delete' on keyboard.

• When you press 'Change' a new window opens:

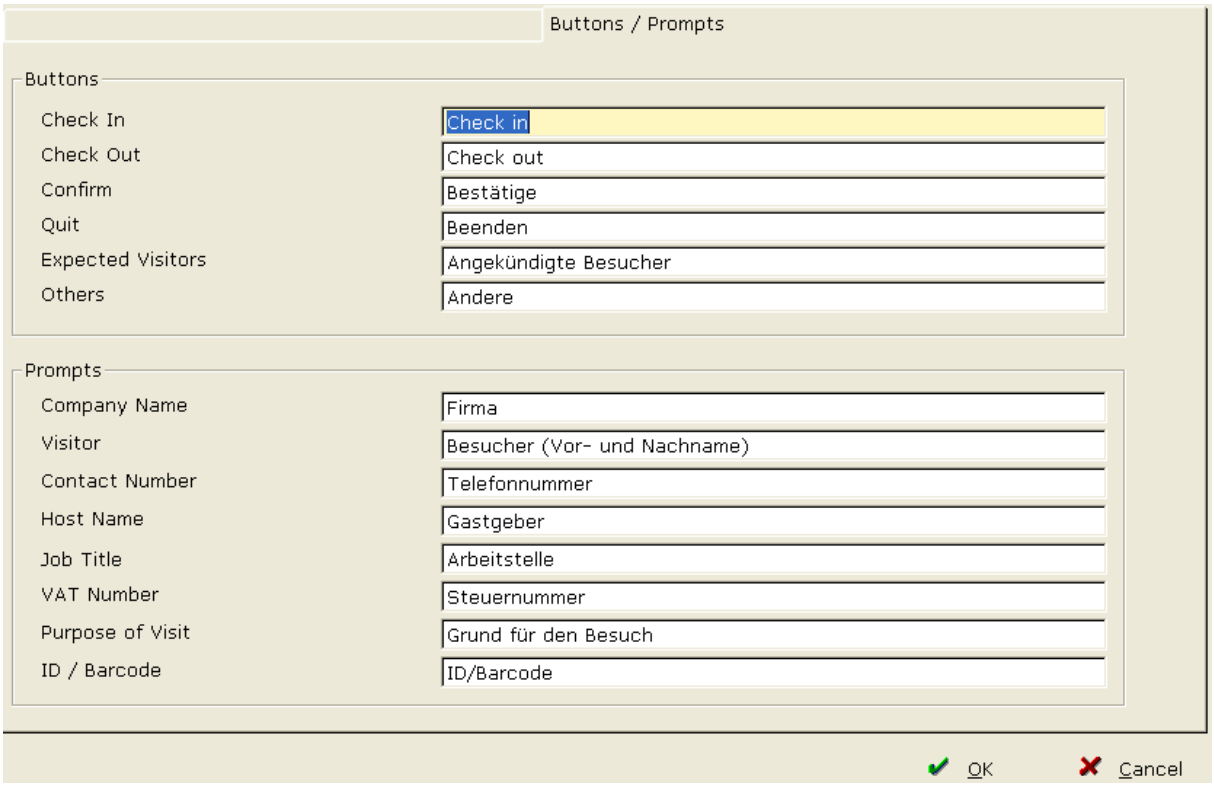

ID / Language - At the top of the window you can see Selected language and his ID number.

Flag: Each language has its own flag. To select a flag press the ... button and select picture from the disk.

• You can also see 'Messages' , 'Instructions' and translations for each message or instruction. For each Message or Instruction you can change translation.

• To change translation for buttons and prompts, press Buttons / Prompts .

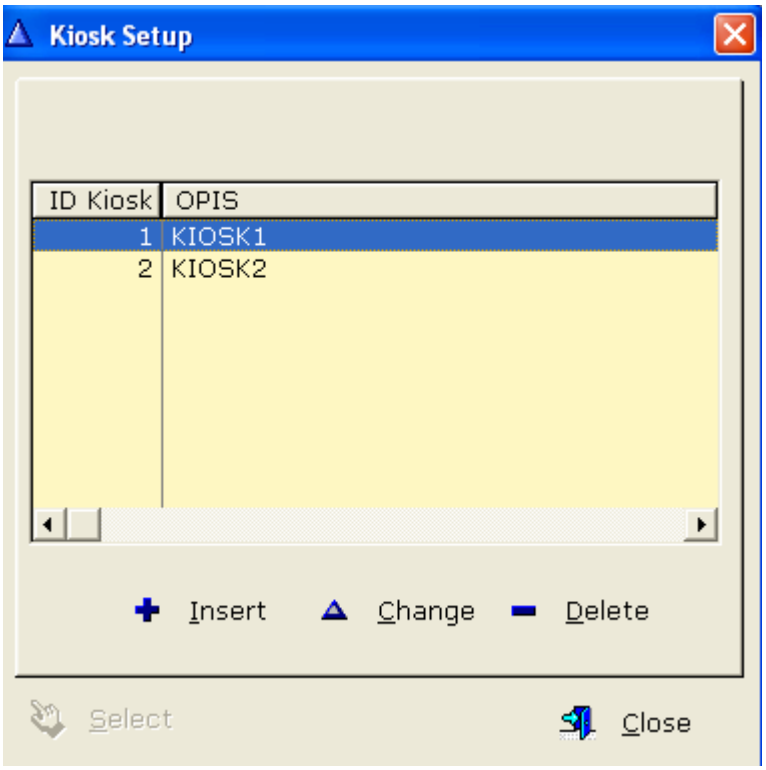

• After entering translations, press 'OK' (alt o) to confirm or 'Cancel' (Alt c) to cancel.

2.2.7. Kiosk

• To add new kiosk or change already created kiosks select 'Kiosk' in setup menu.

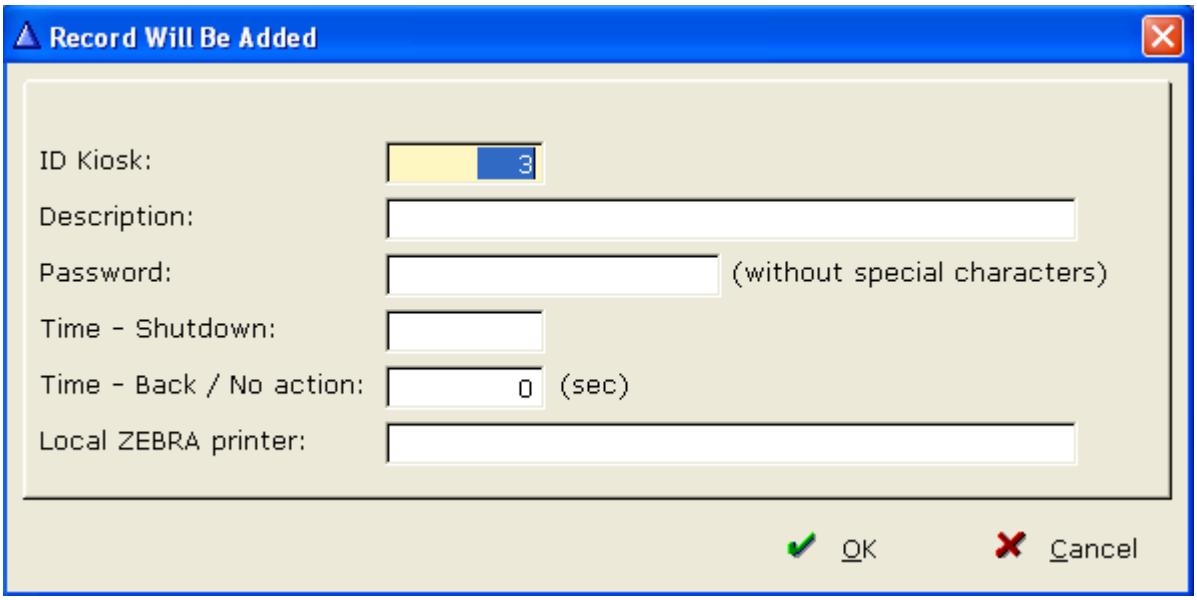

• After clicking 'Kiosk', new window opens:

• At the new window you can see a list of created kiosks.

• If you want to create new kiosk, press ' Insert' button:

ID kiosk: each kiosk has its own unique ID.

Description: Type the name of the kiosk.

Password: Type a password you want to use to enter application.

Time – Shutdown : application will shutdown after certain inactive time. If you type 20:00, application will shutdown after inactive time of 20 minutes.
